

PRABHAT KUMAR

Java Backend Developer

+91 9663076023 | mailtoprabhat72@gmail.com | Bengaluru, India | [Portfolio](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Java Backend Developer with 2+ years of experience building and maintaining REST APIs using Spring Boot, Hibernate, and MySQL in a production environment handling real user traffic. Solid experience in SQL query optimization, indexing, and Redis caching to improve API performance, along with hands-on exposure to deploying and monitoring backend services on AWS (EC2, RDS, S3). Implemented JWT-based authentication and role-based access control using Spring Security. Working knowledge of microservices concepts (API Gateway, service discovery, inter-service communication) and load balancing/fault-tolerance basics. Comfortable debugging production issues and collaborating with cross-functional teams in Agile environments.

TECHNICAL SKILLS

Languages:

Java, SQL

Frameworks:

Spring, Spring Boot, Hibernate, JPA

Databases:

MySQL, MongoDB, Redis (caching)

Cloud & DevOps:

AWS (EC2, RDS, S3), Docker, Git

API & Design:

REST APIs, Swagger/OpenAPI, MVC, Microservices

Security:

Spring Security, JWT, RBAC

Architecture:

API Gateway, Eureka, Load Balancing, Fault Tolerance

Tools:

Postman, JIRA, IntelliJ IDEA, Agile/Scrum

WORK EXPERIENCE

Java Software Developer — Netcore Cloud

Jan 2023 – Mar 2025

Bengaluru, India (Onsite) | Java, Spring Boot, Hibernate, MySQL, AWS, REST APIs

- Developed and maintained REST APIs using Spring Boot and Hibernate for a production system handling real user traffic.
- Wrote and optimized custom MySQL queries, improved data retrieval performance using indexing and pagination on high-traffic endpoints.
- Debugged Hibernate-related performance issues, including N+1 query problems, and improved fetch strategies based on query patterns.
- Implemented JWT-based authentication and role-based access control (RBAC) using Spring Security.
- Used Redis for caching to reduce repeated database reads on frequently accessed APIs.
- Deployed and monitored backend services on AWS (EC2, RDS, S3); handled configuration issues and application logs for production support.
- Documented APIs using Swagger and used Postman for testing, debugging, and validating request/response fixes.
- Collaborated with frontend and QA teams to debug integration issues and resolve production bugs under tight timelines.
- Gained working knowledge of microservices concepts (API Gateway, service discovery via Eureka, inter-service communication) through team collaboration.

Project: Real Estate Listing & Blog Management System

- Backend developer for the blog module within a team of 8 engineers; designed REST APIs for creating, updating, and managing blog posts and user interactions.
- Built MySQL schema for blogs, comments, and user actions with proper relationships and indexing; implemented pagination and filtering for large datasets.
- Applied Spring Security + JWT for secure, role-based API access; used Redis caching on selected endpoints and documented APIs with Swagger.

EDUCATION

BE in Computer Science & Engineering — Visvesvaraya Technological University

2019 – 2023

CGPA: 7.2 | Bengaluru, India

CERTIFICATIONS

- J.P. Morgan Software Engineering Virtual Internship — Oct 2025
- AWS Solutions Architecture Virtual Internship
